HBH Gas Systems: Overview

HBH Gas Systems is the leader in Central Gas Distribution Systems, serving developments of all sizes where natural gas is not available. HBH specializes in the marketing, design, and implementation of fully-engineered systems that allow entire communities to be fueled from a single centralized underground propane tank. The gas is distributed, metered, serviced and billed just like natural gas. HBH leads the industry in establishing systems that comply with all federal codes and regulations and setting protocol for safe, customer-focused operations.

Central Gas Systems from HBH allow developers to steer their communities away from the inefficient, carbon-heavy electric grid toward more sustainable development fueled by gas- and receive the tremendous marketing advantages of dual-fuels. Our systems can fuel the full range of energy demands in any community or resort development. Conventional applications include stoves, clothes dryers, air conditioners, fireplaces, lanterns, standby generators, tankless water heaters, swimming pool heaters, and outdoor kitchens, grills, fire pits and radiant heating systems.

In addition to residential applications, Central Gas Systems from HBH can fuel a wide range of alternative applications. These include propane-powered fleet vehicles and school buses, commercial and retail centers, community centers, critical backup power for lift stations and hospitals, backup power for wind and solar generation, Combined Heat & Power units for both residential and commercial applications, and even eco-friendly lawn care equipment and golf carts.

HBH has formed strategic alliances with some of the nation's largest propane retailers. Together, we are committed to providing seamless and reliable gas service to communities and resorts- any time, any place.

Client Testimonials

“The contract we have with HBH Systems, LLC is truly win-win. The builder can stay competitive with the other area developments, and because LP gas is being used by the homes, the builder is eligible to receive a rebate of up to \$750.00 per house from the Texas RR Commission. We are very pleased with the performance of HBH Systems, LLC. We plan on using their services in future developments and would endorse their company to others.”

*John S. Lloyd
JBDI Development Inc.*

“We are looking forward to a long and successful relationship with HBH Systems, LLC, and would have no problem endorsing their company to other developers for their services.”

*Cosmo Palmieri
Cardinal Hills Investors Ltd.*

“We are fortunate to have HBH Gas Systems and Ferrellgas working with us, installing their high-end product in our development. This saves us, the developer, approximately \$350,000 to \$400,000 in upfront costs by not having to install a trunk line for natural gas and other interior infrastructure on our 155-lot development.”

*Matt Jacobi
Development Manager, Little River Ranch, Poncha Springs, CO*

“HBH Gas Systems...definitely stand apart and differentiate themselves from other suppliers with excellent performance, strength and an undeniable can-do attitude. Other suppliers failed to perform when it came time to install our centralized LP gas system despite months of planning. In one week HBH succeeded in providing a complete, engineered, turnkey installation of the planned underground gas distribution system.”

*Aaron Wooden
COO, Origin Construction, Inc.*

“I’ve installed countless miles of mains on behalf of HBH. They are organized, responsible, and competent. Johnny Ulmer, The VP of Operations, is a true veteran with national and international experience in installing thousands of miles and hundreds of millions of dollars of on-shore and off-shore gas distribution and pipeline systems.”

*Joe Bland
President, Joe Bland Construction, LP*

“Harris and HBH have a wide breadth of knowledge of the construction industry. More importantly, I have found Harris not only easy to work with but a man of high integrity. He has consistently delivered what he promised. He is one of the few people I'd work with without a contract and only a handshake.”

*Wesley J. Peoples
Division President, Meritage Homes/Monterrey Homes*
